## PROFESSIONAL SUMMARY

Results-driven Python Developer with strong fundamentals in data structures, algorithms, object-oriented programming (OOP), and RESTful API development. Hands-on experience building scalable backend systems, data pipelines, and ML-powered applications using Python, Flask, Scikit-learn, and SQL databases. Proficient in writing clean, maintainable, and production-quality code. Experienced with Linux environments, Git workflows, Docker containerization, and Agile collaboration. Passionate about solving real-world problems through efficient, well-tested software solutions.

## TECHNICAL SKILLS

**Languages:** Python, Java, SQL, Bash/Shell Scripting

**Python & Backend:** OOP, File Handling, Exception Handling, REST APIs, Flask, FastAPI, Django

**Databases:** MySQL, PostgreSQL, MongoDB, SQLite

**Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Requests, BeautifulSoup

**ML & AI:** Regression, Classification, NLP, TF-IDF, RAG (Retrieval-Augmented Generation), LLMs

**DevOps & Tools:** Git, GitHub, Docker (Basics), Linux/Ubuntu, VS Code, Jupyter Notebook, Postman

**Testing & Quality:** pytest, unittest, Debugging, Code Review, PEP-8 Standards

**Concepts:** DSA, OS, OOP, SDLC, Agile Methodology, MVC Architecture

**Deployment:** Streamlit, Docker, REST API Integration

## PROFESSIONAL EXPERIENCE

### Data Science Intern — Celebal Technologies

June 2025 – August 2025

- Developed and optimized Python scripts for automated data processing and ETL pipelines, reducing manual effort by ~40% on repetitive data tasks.
- Worked in a Linux-based (Ubuntu) development environment using Bash scripts, virtual environments, and CLI tools for daily development workflows.
- Applied data cleaning, transformation, and EDA techniques on real-world datasets using Pandas and NumPy to extract actionable insights.
- Collaborated with senior engineers following production-quality coding standards including PEP-8, code reviews, and Git branching workflows.
- Debugged and resolved data inconsistencies in large datasets, improving pipeline reliability and data quality.
- Gained exposure to deploying Python applications in containerized environments using Docker basics.

## PROJECTS

### REST API Development with Flask

**Tech Stack:** Python, Flask, SQLite/PostgreSQL, REST API, JSON, Postman, Git

- Developed a RESTful CRUD API using Flask for a task management system, implementing GET, POST, PUT, and DELETE endpoints.
- Integrated SQLite/PostgreSQL as the backend database with SQLAlchemy ORM for efficient data modeling and query management.
- Implemented input validation, error handling (HTTP status codes), and JSON response serialization following REST best practices.
- Tested all API endpoints using Postman and wrote unit tests with pytest to ensure endpoint reliability and edge-case coverage.

### RAG-Based Document Q&A Chatbot

**Tech Stack:** Python, ChromaDB, LangChain, Streamlit, LLMs (Local), PDF/DOCX/TXT Parsing

- Architected a Retrieval-Augmented Generation (RAG) pipeline to enable context-aware Q&A over PDF, TXT, and DOCX documents using local LLMs.
- Implemented document ingestion with chunk-based text splitting, vector embedding, and semantic search using ChromaDB as the vector store.
- Integrated a locally hosted LLM to generate accurate, context-grounded answers, reducing hallucination and improving response relevance.
- Designed a multi-document ingestion system supporting concurrent document uploads and real-time query processing via Streamlit interface.
- Optimized retrieval accuracy through prompt engineering and similarity-search tuning, achieving consistent response quality across document types.

EDUCATION

**Bachelor of Technology — Computer Science & Engineering**

**2022 – 2026**

Arya College of Engineering & IT, Jaipur, Rajasthan

**CGPA:** 8.16(up to 7th Semester) | **Relevant Coursework:** DSA, OOP, DBMS, OS, Computer Networks, Software Engineering

**Class 12th (RBSE) — Science Stream**

2021

Bal Bharti Secondary School — 90.40%

CERTIFICATIONS

**Red Hat Certified System Administration (RHCSA)** — Red Hat

**Generative AI: Foundations and Applications** — Microsoft & LinkedIn Learning

**Programming in Java** — NPTEL (IIT)

**MongoDB University — Introduction to MongoDB** — MongoDB Inc.

**Essentials of C Programming** — Cisco Networking Academy
