PROFESSIONAL SUMMARY

Results-driven Full Stack Developer (B.Tech CSE, 2026) with hands-on experience building scalable RESTful APIs using Python and Flask, and dynamic SPAs with React.js. Proficient across the full SDLC — system design, REST API development, unit testing (pytest), Docker containerization, and CI/CD pipelines. Strong foundation in DSA, OOP, Agile, and MVC architecture. Seeking a full stack or Python backend software engineering role to deliver high-quality, production-ready applications.

TECHNICAL SKILLS

Backend: Python, Flask, FastAPI (Basic), REST API Design, RESTful Web Services, API Integration, Node.js, Express.js, JSON, HTTP/HTTPS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, React Router, React Context API, Responsive Web Design, DOM Manipulation

Database: MongoDB, PostgreSQL (Basic), SQL, Mongoose ODM, CRUD Operations

Testing & DevOps: pytest, Unit Testing, Docker, CI/CD Pipelines, Git, GitHub, Postman, Linux/Unix

CS Fundamentals: DSA, OOP, Operating Systems, SDLC, MVC Architecture, Agile, Scrum, Version Control

PROJECTS

Full Stack Task Manager Application

Python · Flask · REST API · MongoDB · React.js · Docker · pytest · CI/CD · JWT Auth | Personal Project

- Designed and built a full-stack web app with a Python Flask backend exposing 12+ RESTful API endpoints and a React.js SPA frontend — demonstrating complete SDLC execution from design to deployment.
- Implemented JWT-based authentication, request validation, and centralized error handling; integrated MongoDB with Mongoose ODM for efficient CRUD operations.
- Wrote unit tests using pytest achieving 85%+ code coverage; configured GitHub Actions CI/CD pipeline to auto-run tests on every push.
- Containerized the application with Docker and Docker Compose, reducing environment setup time by 80% and ensuring dev/prod parity.

Responsive Portfolio Website — React.js SPA

React.js · JavaScript (ES6+) · React Router · React Context API · CSS3 · HTML5 | Personal Project

- Built a production-ready SPA with component-based architecture, improving code reusability by 60%; implemented dark/light mode via React Context API and multi-page routing with React Router.
- Achieved full responsiveness using CSS3 Flexbox and Grid; optimized Lighthouse performance score to 92+.

Real-Time Weather App & E-Commerce Product Page

HTML5 · CSS3 · JavaScript · REST API Integration · JSON · async/await · DOM Manipulation | Personal Projects

- Weather App: consumed OpenWeatherMap REST API using async/await with full JSON parsing, input validation, and error handling — zero unhandled runtime errors.
- E-Commerce Page: built dynamic product filtering, real-time search, and add-to-cart state management using vanilla JavaScript; improved user engagement by 35%.

EDUCATION

B.Tech — Computer Science & Engineering

OCT 2022 — APRIL 2026

Arya College of Engineering & IT, Jaipur (RTU Affiliated) | CGPA: 8.16 / 10.0 (up to 7th Semester)

Coursework: DSA, OOP, Operating Systems, DBMS, Computer Networks, Software Engineering

Class XII — Science (PCM) | RBSE

2021

Bal Bharti Secondary School, Jaipur | 90.40%

CERTIFICATIONS

- Generative AI — Foundations and Applications | Microsoft & LinkedIn Learning
- Red Hat Certified System Administration (RHCSA) | Red Hat
- Programming in Java | NPTEL — IIT
- Essentials of C Programming | Cisco Networking Academy
- Introduction to MongoDB | MongoDB University
