PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Python, SQL, Machine Learning, and Data Analytics. Skilled in data cleaning, exploratory data analysis, feature engineering, model optimization, and building interactive dashboards using Power BI to deliver actionable insights.

TECHNICAL SKILLS

Programming Languages: Python, Java

Frameworks: Scikit-learn, TensorFlow, PyTorch

Machine Learning: Supervised and Unsupervised Learning, Regression, Classification, Ensemble Techniques

Data Processing & Analysis: Pandas, NumPy, Feature Engineering, Data Wrangling, Statistical Analysis

Data Visualization: Power BI, Matplotlib, Seaborn, Plotly, Streamlit

Data Analytics & BI: Power BI, Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, Dashboard Development, KPI Reporting, Business Analytics

Core Concepts: MYSQL, OOP, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

Data Science Intern — Celebal Technologies

06/2025 – 08/2025

- Built and optimized supervised machine learning models and end-to-end data pipelines, leveraging EDA, feature engineering, and hyperparameter tuning (GridSearchCV, cross-validation), improving model accuracy by 15% and generalization by 8%.
- Designed and automated ETL workflows using SQL and developed interactive dashboards (Streamlit, Matplotlib, Seaborn), reducing data processing time by 20% and enabling data-driven decision-making through effective model evaluation (AUC-ROC, precision, recall, F1-score).

PROJECTS

Customer Shopping Behavior Analysis

- Performed end-to-end analysis on customer shopping data by extracting, cleaning, and transforming raw datasets using Python and Pandas And Conducted Exploratory Data Analysis (EDA) to identify customer demographics, purchasing patterns, sales trends, and key behavioral insights.
- Developed SQL queries using joins, aggregations, subqueries, and window functions to analyze customer segments, revenue contribution, and product performance.
- Built an interactive Power BI dashboard featuring KPI cards, trend analysis and slicers through functionality for real-time business insights.

SmartHire AI – Resume Screening & Candidate Tracking System

- Developed an AI-powered ATS system for resume screening, candidate tracking, and recruitment workflow automation.
- Implemented NLP-based resume parsing, skill extraction, and AI match scoring using TF-IDF and cosine similarity.
- Built an interactive Streamlit dashboard with candidate ranking, analytics visualization, and SQLite database integration.
- Added authentication, email notification system, and multipage navigation for efficient candidate management.

MailGuard: End-to-End Spam Detection ML Pipeline

- Built an end-to-end machine learning pipeline for spam detection, including preprocessing, feature engineering, model training, and evaluation on 4,600+ emails
- Implemented RandomForest and Logistic Regression with hyperparameter tuning and cross-validation, achieving 98% accuracy.
- Applied feature selection, reducing dimensionality by 30% and improving inference speed by 40%
- Deployed the model as interactive web application using Streamlit, enabling real-time spam prediction and user input handling

EDUCATION

B.Tech — Computer Science & Engineering,

Arya College of Engineering & IT, Jaipur | RTU Affiliated with 8.2 CGPA

09/2022 – 04/2026 | Jaipur, Rajasthan

Class XII — Science (PCM) | RBSE

Bal Bharti Sr. Secondary School, Alwar | Percentage: 90.40%

07/2020 – 06/2021

CERTIFICATIONS

- Generative AI — Foundations and Applications | Microsoft & LinkedIn Learning
